Addendum

The *entD* gene of the *Escherichia coli* K12 enterobactin gene cluster

PETER E. CODERRE and CHARLES F. EARHART

Journal of General Microbiology (1989), **135**, 3043–3055.

The authors wish to add the following statement:

In this paper we neglected to cite an abstract (Armstrong *et al.*, 1989*a*) in which sequencing of the *entD* gene and localization of its product was reported. Also, since our paper appeared we have become aware of a paper (Armstrong *et al.*, 1989*b*) detailing the results presented in the above abstract. We also wish to (i) cite our abstract (Coderre & Earhart, 1986) in which the plasmid (pPC5-4) containing an *entD*::Tn5 mutation was first described, and (ii) acknowledge that the studies we reported were primarily taken from a dissertation submitted by Peter E. Coderre to the Graduate School, The University of Texas at Austin, in partial fulfilment of the requirements for the PhD degree.
