CORRIGENDUM

Characterization of IS900 loci in *Mycobacterium avium* subsp. *paratuberculosis* and development of multiplex PCR typing

Tim J. Bull, John Hermon-Taylor, Ivo Pavlik, Fouad El-Zaatari
and Mark Tizard

***Microbiology* (2000), 146, 2185–2197**

p. 2186, right column, lines 31–32.

The sequence of Loc14R should read: TCACGGCGGTCAGGTTACTTC

p. 2188, left column, **PCR reaction conditions**, lines 2–5.

The text should read: ...The PCR mix consisted of a 50 μl reaction volume containing a final concentration of 2 pmol of each Loc primer μl^{-1} , 10 pmol of each IS900 primer μl^{-1} , 10 % (v/v) DMSO, 1.5 mM MgCl_2 , 200 μM dNTP...
