CORRIGENDA

Effect of Gramicidin S on the Transcription System of the Producer *Bacillus brevis* Nagano

By MARIA FRANGOU-LAZARIDIS AND BARRIE SEDDON

Journal of General Microbiology (1985), **131**, 437–449

p. 442, first paragraph:

the first two sentences should read 'During purification, RNA polymerase activity was found to be completely dependent on added template after the ammonium sulphate precipitation (Fraction III), and linearly dependent on the amount of enzyme protein added up to $300\ \mu\text{g ml}^{-1}$ with both calf thymus DNA and herring sperm DNA as templates. Some of the requirements of the RNA polymerase activity are shown in Table 1.'

Cytoplasmic Ca^{2+} Homeostasis Maintained by a Vacuolar Ca^{2+} Transport System in the Yeast *Saccharomyces cerevisiae*

By Y. EILAM, H. LAVI AND N. GROSSOWICZ

Journal of General Microbiology (1985), **131**, 623–629

Table 2, line 2, column 4:

for ' $(3.10 \pm 0.06) \times 10^{-6}$ ' read ' $(3.10 \pm 0.06) \times 10^{-10}$ '.
